PROFILE

I am a Frontend Developer with expertise in developing responsive and accessible web applications using HTML, CSS, TypeScript, and JavaScript frameworks such as ReactJs, Vuejs, and Angular. I possess a strong understanding of user-centered design principles and have experience working in agile development environments using Git for version control. I am a results-driven problem solver with excellent time-management abilities and strong attention to detail. Moreover, I am an effective communicator and collaborator with the ability to work in cross-functional teams.
